# Do you have an Apple laptop running OS 10.6?

When you connect your computer to a classroom projector:

Do your images look like this?   When they should look like this?

Next time you connect to a projector, perform the following steps.
1. Go to System Preferences > Displays
2. In the "VGA Display" window (**NOT "Color LCD"**), click the 'Color' tab
3. Uncheck the box labeled "Show Profiles for this display only"
4. In the Display Profile dialog box, select "sRGB IEC61966–2.1"

Your computer should remember the new setting for future classes.
